

Dear Dr Olders,

Thank you very much for having contributed to the success of the Conference on Cancer Rehabilitation. The energy and enthusiasm of all speakers was contagious, and most participants left with intentions to develop a service which would enhance the quality of life for patients with cancer.

Your presentation was excellent and the topic of sleep disturbances enlightening. I hope that our paths will cross again in the near future. The new Association or College of multidisciplinary professionals involved in this field is moving ahead with plans to host an inaugural meeting in Washington this spring. Locally, we are in process of establishing an out-patient cancer rehabilitation service and will be calling upon members of the Montreal community of specialists to participate. I hope that we can call upon your expertise if a patient need arises.

Enclosed is a small token of our appreciation for your having taken the time to participate in the Conference. Thank you once again,

Sincerely,

  
Mary-Ann Dalzell  
Conference Chair
