

November 19, 1987

Dr. Henry Olders
Douglas Hospital
6875 LaSalle Blvd
Verdun, Que. H4H 1R3

Dear Dr. Olders:

This is to express our appreciation for your contribution to our Social Problems class for nursing students on November 3rd. We certainly met our goal, which was to sensitize our students to the problems of deinstitutionalization and the specific implications for their professional role, including resources and options for treatment of the chronically, mentally ill population.

Your particular contribution was especially helpful in providing historical perspective and context to the discussion of the current problematic. We do hope to have the opportunity to call upon your expertise again.

Sincerely,

Cerise Morris for Mary Hlywa
Social Service Department
