Dr. H. Olders,
Douglas Hospital

Dear Dr. Olders:

Henry!

I would like to thank you for being part of our teaching program for the year 1989-1990, as well as your willingness to contribute to the excellence of the program.

The Training Committee and the Curriculum Committee continue to review, revise, maintain and upgrade the training program. It is important that we receive as much feedback as possible. Resident feedback permits us to evaluate seminars and programs. Over the years, this has assisted Diploma Course teaching to maintain relevance and interest for residents. Likewise, we would like your feedback from your teaching experience. The Block Chairpersons will also give you feedback about your particular seminar.

Our department staff have a wide range of interests, and it is important that we have a reasonable distribution of teaching among the faculty members. Since one of the goals is to have the state of the art in psychiatry training, it is possible that some topics, content and/or format of the lectures change from year to year. Your ideas are an important part of this process, so we hope to hear from you.

It is good to know that we can count on staff members like you who are interested and committed to the training of our future colleagues.

*In appreciation of
your participation
in Block H*

Yours sincerely,

Ruth
