Dear Dr. Olders,

The executive and the membership of AMI Quebec are singularly well placed to appreciate the demands made on the time of professionals like yourself. We are therefore most grateful for the time and thought you devoted to responding to the request made on February 3rd, 1989 for a letter of reference that could be used in the media relations and public awareness program then being planned by our organization.

The Spring campaign was a qualified success - not perhaps as extensively embraced as we might have hoped but a start at least towards our shared objective of promoting an improved understanding of mental illness. Your warm endorsement adds to the credibility of our continuing efforts and we thank you for it.

Yours sincerely,

D. Riva Gelber
Chairman,
ACTION COMMITTEE
