February 26, 1988.

Dear Dr. Olders,

On behalf of our Association may I express our heartfelt appreciation for accepting to be our guest speaker at our recent general meeting of Feb 17, 1988.

Of course you understand the concerns of those families who must deal with psychotic persons and require support themselves to deal with the mental illness of their loved ones.

You will have seen how for the most part they seek communication with and from the psychiatrist in order to help them alleviate their own fears and often their own feelings of guilt, such as they may be. That you personally seek and welcome such communication was indeed encouraging to hear.

Again our sincere thanks.

By Susan, Sec.
